FROM: Tony Gallegos, Reclamation Engineer *aa*

RE: Site Inspection, Robert L. Clark, Number 1 Clark Mine, S/015/074 (ML-43181), Emery County, Utah

Date of Inspection: October 8, 1998  
Time of Inspection: 1300 - 1315  
Conditions: Sunny, warm  
Participants: John Blake, Trust Lands Administration; Jim Smith (Coal Regulatory Program) and Tony Gallegos, DOGM

Purpose of Inspection: To examine the status of this operation and the geology of the coal and humate seams while in the area.

The surface disturbance at the site does not appear to have changed since the last site inspection. The old coal mine portals are partially excavated, but there is no other signs of recent mining activity. Photographs were taken of the seam for comparison with other humate operations.

A GPS unit was used to take a point for this mine location. The point was named "cowboy" under rover file R10819A. **The UTM coordinates of this point after making corrections are: East 480862.00656 North 4299288.12511.** A copy of the portion of the Mesa Butte quad map showing the location of this point is attached.
